Location:

808 St. Mary's St., Fredericton, NB.

Contacts:

Scott Targett

scott@targett.ca

Products and Services:

Windows and Doors

Date of Case Study:

April 15, 2009.

Achievements:

Celebrating over 20 years in the industry, Targett's Windows and Doors knows how to pick the product that is right for you. Retailing Canada's #1 Energy Star rated windows makes that choice even easier; because who wouldn't want to be paying less on their energy bill?!

An Energy Star rated window refers to the minimal level of temperature exchange between the inside of your house and the outside, which means if you have your air conditioner running you won't be cooling the outdoors, and if you have your heat on, you won't be heating the outdoors. Targett's has established themselves as a national leader in environmentally conscious products and are happy to be serving the Fredericton community. In addition to providing their customers with the greenest products on the window market in Canada, Targett's also made use of recycled material when they refaced their showroom about one year ago. The entire façade of Targett's is the limestone that was removed from the Lord Beaverbrook Hotel when it was stuccoed – talk about stylish recycling! Also, Targett's re-insulated their entire building, and have all their outside lighting on timers.

Targett's is already a Green Shops Gold member, and is proudly displaying their decal in one of their top-rated windows! With 33 credits Targett's is raising the environmental standards in their industry.
